SketchUp Release Notes

Bug fixes / small features added

- (Win) Fixed a crash that could occur when changing scenes while Scan Essentials is activated.

- (Win) Fixed an issue where copying and pasting between two open SketchUp instances did not work.

- (Win) Fixed an issue where shortcuts for special characters did not work properly.

- (Win) Fixed an issue where non-alphanumeric keyboard layouts do not trigger shortcuts.

- (Win) Fixed an issue where the color wheel was responding inaccurately to clicks.

- The disc perimeter of an existing snap is now highlighted on hover when in Snap Modify or Erase mode.

LayOut Release Notes

Bug fixes / small features added

- The default settings for Render Override is now off for existing files that were not not previously opened and saved in 2023.1

- Fixed an issue where LayOut would require a re-render of a SketchUp model viewport at random times.

- Fixed an issue where autotext labels linked to viewports were not updating to reflect changes made to the viewport model.
